PROFILE

I'm a Full Stack Laravel Developer with over 3 years of experience building scalable websites and web applications. My expertise is in **Laravel and MySQL** for backend development, where I focus on RESTful APIs, authentication, roles & permissions, database design, and system integrations. On the frontend, I work with **Blade, Bootstrap, jQuery, and ReactJS** and **NEXTJS**, delivering complete and modern user interfaces. I specialize in creating secure, optimized, and maintainable systems for both startups and enterprise projects.
